

# MISSION BRIEFING

FOR YOUR EYES ONLY

## CLASSIFICATION: SECRET

The President of the Interstellar Alliance has requested that *Entil'zha* despatch the Rangers to take part in an operation in alliance with other organisations to prevent the detonation of an explosive device by terrorists. Although possessed of some doubts about the wisdom of this decision, Ranger One has agreed that you will assist in this plan.

Your basic mission briefing will be provided Agent B, an operative of the organisation known as The Agency. He appears to be human. We recommend that you pay attention to what he tells you, but advise you assume that he will not be entirely honest with you.

Rangers in the field have reported that the terrorists involved are agents of the Shadows, or of their proxies, the Drakh. We believe they are trying to get hold of an ancient item of First One technology, or failing that, destroy it. We cannot allow this to happen.

You must prevent them from claiming this item. Ideally, you must acquire this item for safe-keeping by the *Anla'shok*, but we would accept its destruction.

You should follow your training and use all resources available to you, in order to achieve these goals. Try to avoid detection, but make use of intelligence provided during your mission, information possessed by conference delegates and any other secondary resources.

**We walk in the dark places no others will enter.  
We stand on the bridge and no-one may pass.  
We live for the One, we die for the One!**
